

The way we are serving to others.

Volunteer work in our community is something that characterize our church and we are very proud of it. You will be able to take a look of some of the ministries that are being developed by our members.

God's work through sports

Every two weeks we are arranging soccer games with brothers from El Cordero de Dios church and all of the players are inviting one friend to the games, so they can get interested in our community and to attend to our services.

Divina Providencia Hospital mission

Our youth and children are working to help the hospital's patients who need support in their painful days. Handcrafts and prayers for each patients are two of the important actions we do in the hospital for the patients.

Hospital's cultives

The church added a tomato growing project leading by Boris Corpeño who is teaching to children and youth the love of agroculture at Divina Providence Hospital green area since October 2017 and thank God we have reduce expenses to the hospital's administration.

Last Month's Events

English and music school

Our English and music school has increased the number of children enroll to the classes. Most of the children live in San Roque community and they have been attending the school since January 2018. This group was encourage to attend to the classes since December 2017 due to the Quantick family visit.

Until now, we are serving 30 children whose age is between 6 to 14 years in our school and we are praying to get more teachers to provide an specialized and better service to the children according their ages and their abilities in music.

Reverend Virginia Quintana Salazar is the one leading this amazing school that teach us every Saturday that God's love can be spread in many ways and we are doing it through the music and English lessons, handicraft and taking care of each student. The school gives them free refreshments and transportation.

Thank God children are happy with the study and the loving care received at school. The parents are satisfied and sometimes attend the Sunday services.

In our future plans, we hope God can provide us with new classrooms for the children, so they can have a better space in where they can develop in each age and with the different music classes.

We would like to extend some of our classrooms and build a second floor for the older children and adequate the Bible's school on Sundays too.

English and music school is one of our stronger and bigger ministry in the church and we hope God let us continue working and spreading his word and his love to all the families and all the children in our school so we can accomplish God's mission in our community.

Please continue praying for this ministry.
